

Mounting Autoharp Strap Buttons

1. Using a 3/16" or smaller drill bit, drill a small hole at the points shown in Figure 1 below. Make sure that you use caution and drill slowly.
2. Take the button and hold it with the cup side up. Insert the screw so that the head of the screw is inside the cup.
3. Using a Phillips screwdriver, carefully screw the buttons into the holes that were previously. When screwing in, be sure to be careful and screw slowly. Use a little bit of hand soap on the threads if the screws become tough to screw in.
4. CAUTION - Tighten the button to the point where it is snug against the body of the Autoharp. Without over tightening, be sure not to leave buttons loose. Leaving the buttons too loose or too tight may
